Bianco Map.pdf

Monica,

Please see email below and attached wetland boundary map, provided by Travis Morse, the prior Corps project manager who conducted the wetland delineation.

Please let me know if there are any questions.

Lesley McWhirter

Hello Lesley, Please see the attached map showing a wetland boundary between Corps' data points C1 and C2. I digitized the boundary and calculated the wetland impact area to be 0.17 acres. If you are available to discuss tomorrow, please let me know a time that works. Best regards,  
Travis

Hi Travis,

As we discussed, I cannot find a map in our file that shows the wetland boundary through the "disturbed area" on the Bianco property. I'm attaching the map that you drew and an aerial photo that shows your 2 data points. C1 is wetland and C2 is upland. If you can recall the wetland boundary, would you please draw it in on one or both of the attachments. You estimated the graded wetland area at about 0.17 acre.

Thanks very much,

Lesley
